Instructions

SETTING TIME & DATE (on the back)

Hold the [MODE] button for 2 seconds: the minute digits start flashing. Press [ADJ] until the right number is reached. Press [MODE] and adjust the hours using the [ADJ] button. Press [MODE] and use [ADJ] to change the time format (12/24 h). Press [MODE] and adjust the date using the [ADJ] button.

SETTING ALARM CLOCK (on the back)

Press [MODE] and then hold the button until the minute digits start flashing and the icon  is displayed. Press [ADJ] until the right number is reached. Press [MODE] and adjust the hours using the [ADJ] button. Press [MODE] to confirm the alarm. To dismiss it, press [MODE] once and [ADJ] 3 times (until the icon disappears). If the icon  is displayed, the device will beep at the start of every hour.

MAX/MIN MEMORY FUNCTION (on the back)

Press [MAX/MIN] to display the maximum and minimum temperatures registered since the last reset. Hold the button for 2 seconds to delete the records.

ADDITIONAL INFORMATION

- Press [°C/°F] to change the temperature unit.
- If the temperature or humidity measured is out of range, the "HH.H" or "LLL.L" error code will be displayed.

Do not use inside oven or microwave oven. Do not wash in a dish washer. If the display becomes dim, replace the batteries.
