Instructions for use

Wipes ready for disposable use.

First remove the lid, then remove the tinfoil sheet that seals the tub. Pull out the wipe from the center, and push the first sheet through the distribution slot in the center of the lid.

Put the lid back on the tub.

Pull out the number of wipes required, and wipe the surface to be disinfected. (14 wipes / m²).

After wiping the surface, leave the product to react for 5 minutes for an action bactericidal, yeasticidal, fungicidal and virucidal. Allow the surface to dry. Do not rinse.

When empty, the tub should be disposed of as non-dangerous waste, according to the advice given by municipality. Do not re-use. Do not dispose of by throwing into drains, rivers or streams.

Precautions for use

Using these wipes do not avoid following the usual cleaning procedure prior to disinfection.

This product is meant to disinfect smooth and non-porous surfaces. Some Plexiglas are sensitive to alcohol, a use test on this surface is recommended.

For external use only.

In case of contact with the eyes, rinse immediately with copious quantities of clean water, and consult a specialist.

Precautionary advice- Storage : Store in a well ventilated environment. Store in a cool place.

Precautionary advice- Elimination : When empty, the tub should be disposed of as non-dangerous waste, according to the advice given by municipality.

Please consult the MSDS before use (available on request).

Avoid all contact with the eyes, the mucous, irritated. Keep away from heat, hot surfaces, sparks, naked flames or any other source of inflammation. Do not smoke.
